If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

*** This office action is in response to the decision of the Board of Patent Appeal and Interferences (BPAI) dated January 23, 2008. Claims 1-52 are pending.

*** The restriction requirement between inventions of claims 1-30 and claims 31-52, as set forth in the Office action mailed June 10, 2005 and November 23, 2004, has been reconsidered in view of the allowability of claims 1-30 for the reasons by the Board of Appeal decision dated January 23, 2008 to the elected invention pursuant to MPEP § 821.04(a). Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions of claims 1-30 and claims 31-52, as set forth in the Office action mailed on June 10, 2005 and November 23, 2004 is hereby withdrawn**, and claims 31-52 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

1. Claims 1-52 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-30 are allowed for the reasons as set forth in the decision of the BPAI dated January 23, 2008. Claims 31-52 are allowed for the similar reasons set forth in the BPAI decision dated January 23, 2008, in that the references including Yamazaki I (5,365,080), Yamazaki (5,893,730), Andra (IEEE Article, 1997, pp 639-42), Admitted Prior Art, etc., of record, alone or in combination, do not anticipatively disclose each and every aspect of the claimed method, or fairly make a prima facie obvious case of the claimed method, in combination with other processing claimed limitations as recited in base claims 31,33,34,36, the inclusion of having the first regions of the upper surface of the semiconductor film overlapping

with only a portion of the second region of the upper surface along the first direction (base claims 31,34) or along the short direction of the laser beam (base claims 33,36) by forming a first crystalline region by irradiating a first region of the upper surface of the amorphous semiconductor film with a first laser beam by relatively moving the first laser beam in a first direction (a short direction as recited in claims 33,36); and after forming the first crystalline region, forming a second crystalline region by irradiating a second region of the upper surface of the amorphous semiconductor film including a portion of the first crystalline region with a second laser beam by relatively moving the second laser beam in a direction parallel to the first direction (a short direction as recited in claims 33,36); wherein a wavelength of the first laser beams falls in a range of 370 nm through 650 nm, a wavelength of the second laser beams falls in a range of 370 nm through 650 nm, the first region of the upper surface of the semiconductor film overlaps with only a portion of the second region of the upper surface along the first direction (a short direction as recited in claims 33,36).
